

SOMASTREAM

Cinematic Kajabi Course Theme

INSTALLATION • CUSTOMIZATION • FEATURE GUIDE

SomaStream product artwork — designed for premium on-demand learning.

VERSION 1.0.1	PLATFORM Kajabi Products	EDITION Advanced Theme
--------------------------------	---	---

Start here

A fast, safe installation path for a production Kajabi course.

What this package is

SomaStream is a production-ready Kajabi Product theme with a cinematic member home, flexible module journeys, premium lesson pages, native Kajabi progress and strong mobile navigation. The brand shown in this guide is a starter identity; every major color, font, label and layout is editable in Kajabi.

PACKAGE TO UPLOAD

Upload nova-learning-kajabi-theme-1.0.1.zip exactly as supplied. Do not unzip it, rename internal folders, or add another directory level.

Install in three steps

01 Upload

Products → your course → Customize → Install Template.
Choose the supplied ZIP.

02 Activate

When Kajabi finishes processing, open the new theme and set it as the active template.

03 Brand

Set the four global colors, body/heading fonts, H1–H3 sizes, logo and navigation.

04 Verify

Test home, Categories, Category, lesson, search and mobile navigation with a real member.

Recommended setup order

- Global Settings → four-color system → typography → logo/favicon.
- Header → navigation, search, announcement popup and announcement bar.
- Product → hero layout, homepage layout, favourites and Explore More action.
- Categories and Category → choose Cinematic Journey or Classic NOVA Grid independently.
- Lesson/Post → test video, audio, downloads, complete, save, Previous/Next and Categories switcher.

The screenshot displays the Kajabi Themes management interface. On the left is a sidebar with navigation options: Dashboard, Products (with a sub-menu including All Products, Courses, Coaching, Community, Podcasts, Newsletters, and Downloads), Sales, Website, Marketing, Contacts, Analytics, Agents, Media Library, Amplify, Partner Program, Backstage, More, Settings, and Give Feedback. The main content area is titled 'SomaStream - On-Demand Yoga Library' and includes tabs for Outline, Customize (which is active), Offers (2), Customers (4), Certificates, and Settings. A notification bubble at the top right states, 'You've built out 48 products and a full stack of assets, but your 1:1'. Below the tabs, the 'Advanced Customization' section provides instructions: 'Personalize your active template, pick a new template, or install templates for later.' It features a preview of the active theme, 'Nova Learning Ka...', marked as 'Active' with a green dot, and an 'Install Template' button. Below this is a section for 'Installed Templates'. On the far right, a dark sidebar contains a 'New conversation' button and a chat interface with a search bar and a message from 'Cofounder can ma'.

Kajabi theme management: open Customize, then edit the active SomaStream theme.

Feature map

Everything included in the theme, grouped by the member journey.

Area	What members get	Backend control
Product home	5 hero designs, 3 syllabus layouts, progress, favourites, featured modules	Independent layout selectors and visibility controls
Categories	Course overview, module cards, progress and locked/drip states	Cinematic Journey or Classic NOVA Grid
Category	Breadcrumbs, module progress, Up Next and compact lesson journey	Cinematic Journey or Classic NOVA Grid
Lesson	Video/audio, downloads, comments, assessment, save and completion	Native Kajabi content plus editable labels
Navigation	Desktop header, search, announcements and mobile bottom navigation	Visibility, link lists and label controls
Community	Optional embedded Kajabi community experience	Off by default; width and height controls
Brand system	Consistent background, surfaces, text and actions	4 colors, 2 font families, direct px sizes
Access states	Clear lock, paywall, drip and schedule presentation	Unavailable cards remain non-clickable

Kajabi-native behavior retained

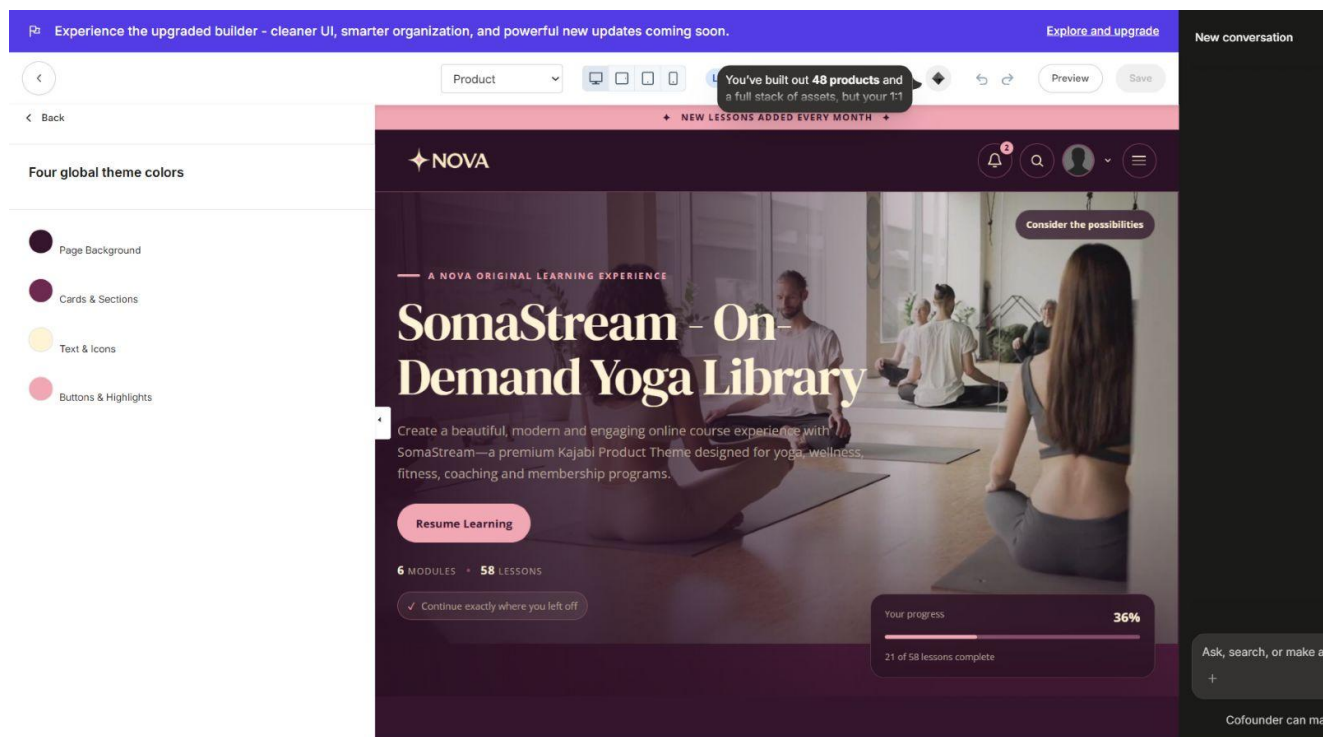

- Start/resume learning, course and lesson progress, completion and saved lessons.
- Comments, assessments, downloads, downloadable MP3 resources and announcements.
- Search, member menu, product access, category paywalls, locks and drip schedules.
- Context-aware editor IDs so visible blocks and sections open the correct Kajabi setting.

DEFAULT EXPERIENCE

Featured Categories is the default product-home layout. Cinematic Journey is the default on Categories and Category pages. The standalone Community Widget is off by default.

Global brand system

Build a lighter or darker identity without chasing colors across individual sections.

Four global colors control the page, cards, typography and primary actions.

Page Background

The dominant canvas behind the complete member experience.

Cards & Sections

Surfaces for cards, panels, module blocks and lesson outlines.

Text & Icons

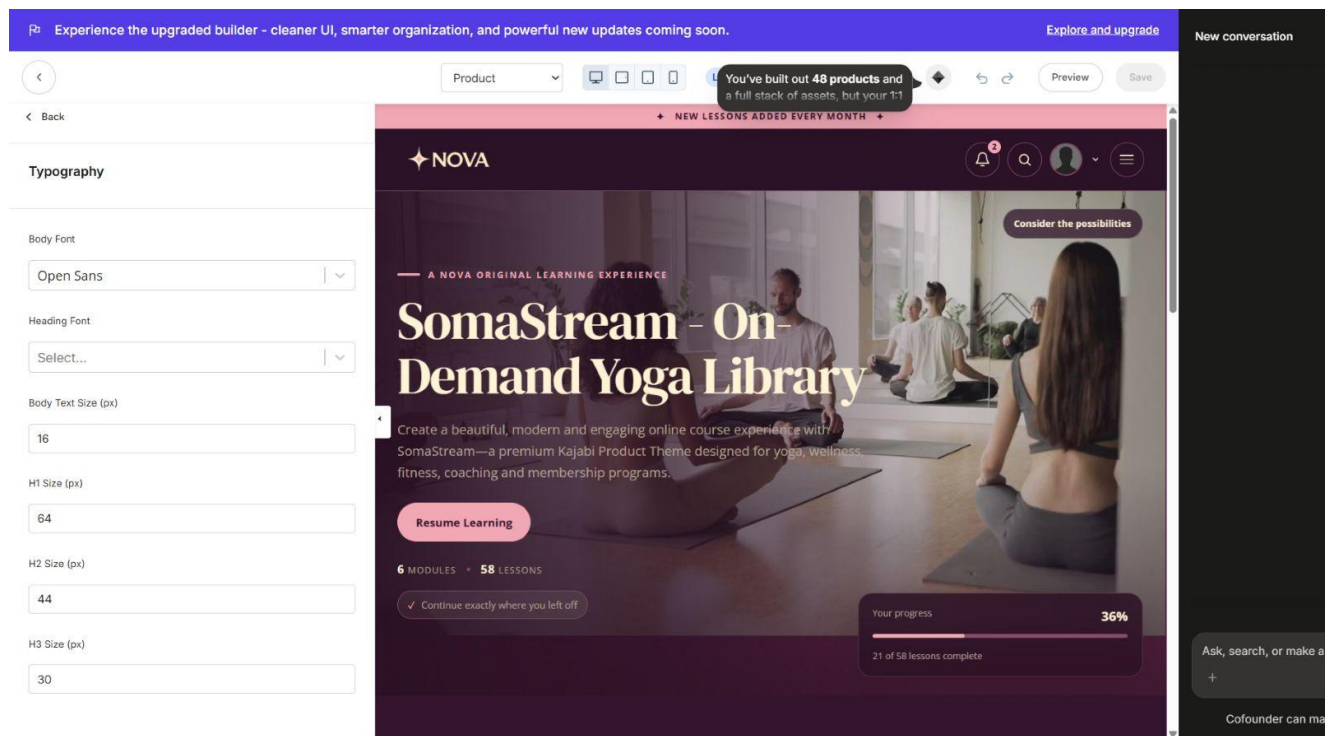

Primary readable color for headings, copy, icons and controls.

Buttons & Highlights

Actions, progress emphasis, badges, dots and active states.

STARTER PALETTE

Page #35152D • Surface #6D294F • Text #FFF4D6 • Action #F2A7B5. For a lighter edition, start by brightening Page and Surface while preserving contrast.

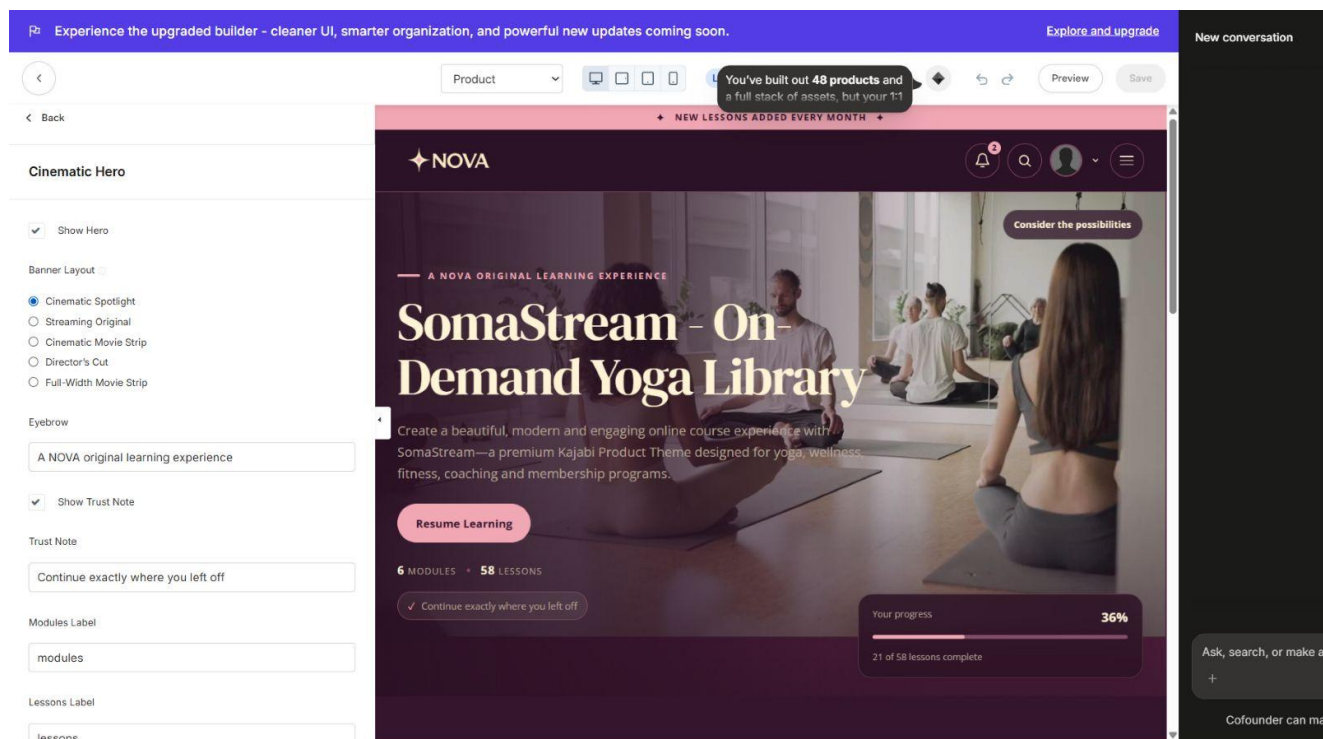

Typography supports separate body and heading families plus direct Body, H1, H2 and H3 pixel controls.

Mobile typography is protected with responsive safety caps, so large desktop headings remain readable and do not overflow smaller screens.

Product Home — hero banner

Choose one of five cinematic entry points without changing course content.

The Product Hero panel exposes five selectable banner layouts and supporting content controls.

Cinematic Spotlight

Large immersive image/video with course copy, Resume Learning and progress.

Streaming Original

Editorial streaming-style hero with stronger content framing.

Cinematic Movie Strip

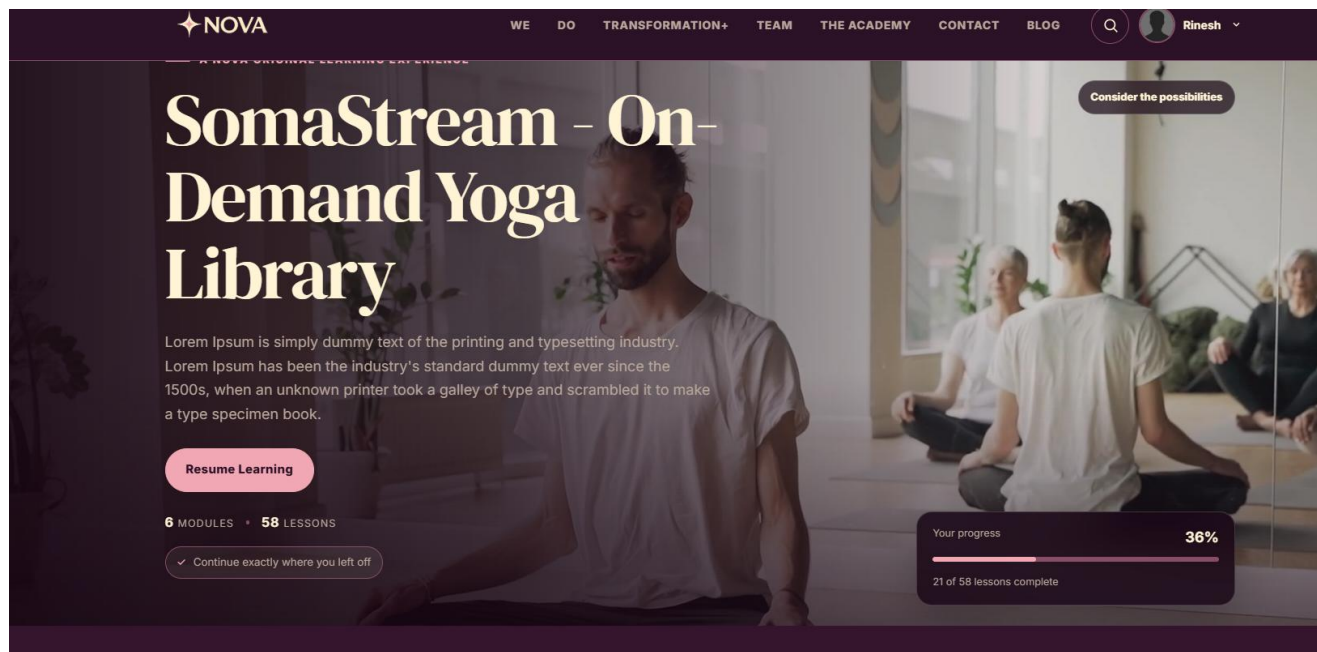

Wide movie-strip composition for a premium library feel.

Director's Cut

A more curated poster-and-story presentation.

Full-Width Movie Strip

Maximum-width visual emphasis for cinematic imagery.

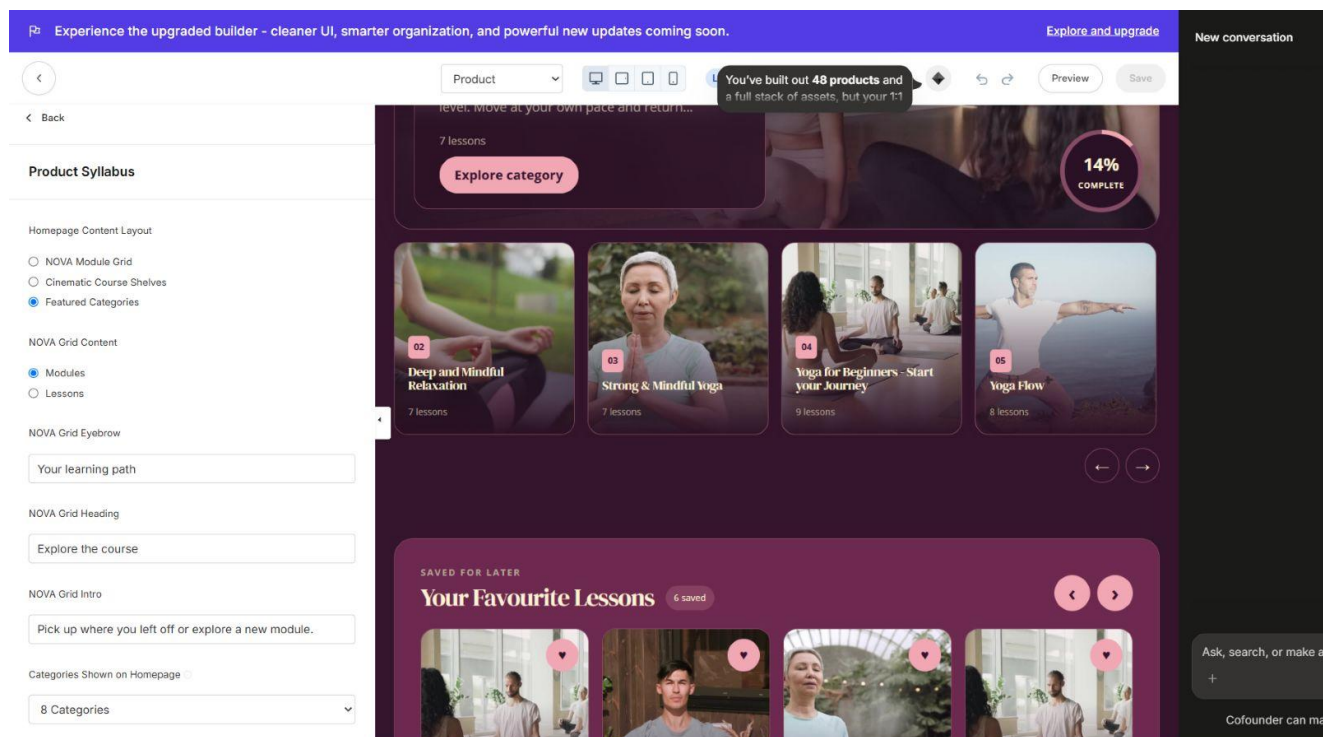

Member view: hero banner, course stats, Resume Learning and overall progress.

EDITABLE HERO CONTENT

Show/hide hero, eyebrow, title/description source, trust note, module and lesson labels, locked label, video tint, product information, Start/Resume blocks and progress display.

Product Home — course discovery

Select the home structure that best matches the size and style of the library.

Product Syllabus controls: three layouts, item limits, Explore More action and favourites visibility.

Featured Categories — default

A lead category feature with editorial hierarchy, supporting cards and an Explore More action.

Cinematic Course Shelves

Module shelves with a large feature card, lessons, carousel controls and progress.

Classic NOVA Module Grid

A clean grid for compact course browsing; favourites can remain independently visible.

Favourites slider

Saved lessons appear in a premium horizontal slider with arrow navigation, swipe/scroll support and a progress indicator. Visibility is independent for supported homepage layouts, including the NOVA Module Grid.

Header, search & announcements

Keep course discovery and member communication available throughout the product.

Header controls for logo, links, search, member menu, announcement popup and announcement bar.

- Logo image or editable text fallback, with Course Home, Website or Library link destinations.
- Configurable Kajabi link list for desktop navigation.
- Search can be shown or hidden independently.
- Announcement bar and popup are separate controls with editable titles, empty-state copy and View All label.
- Member menu remains accessible from the branded header.

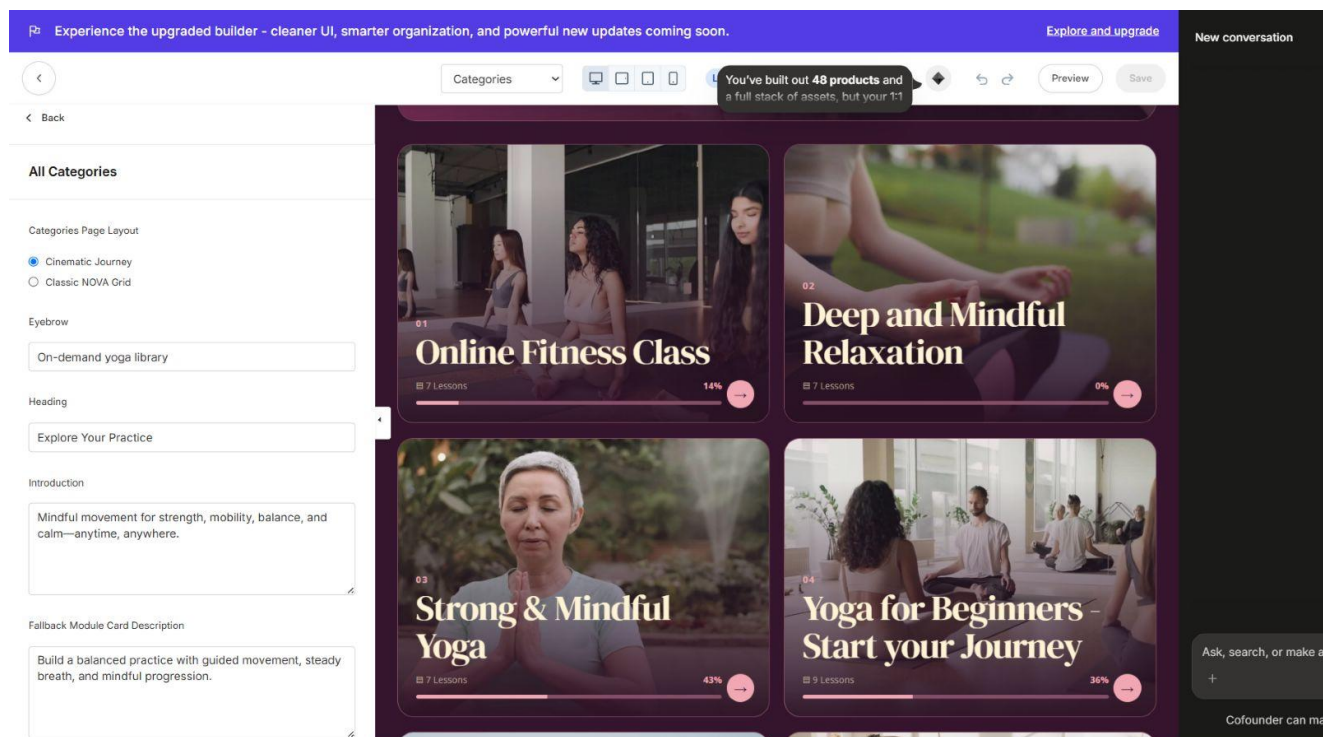

Search copy controls: placeholder, default suggestion label and no-results message.

SEARCH BEHAVIOR

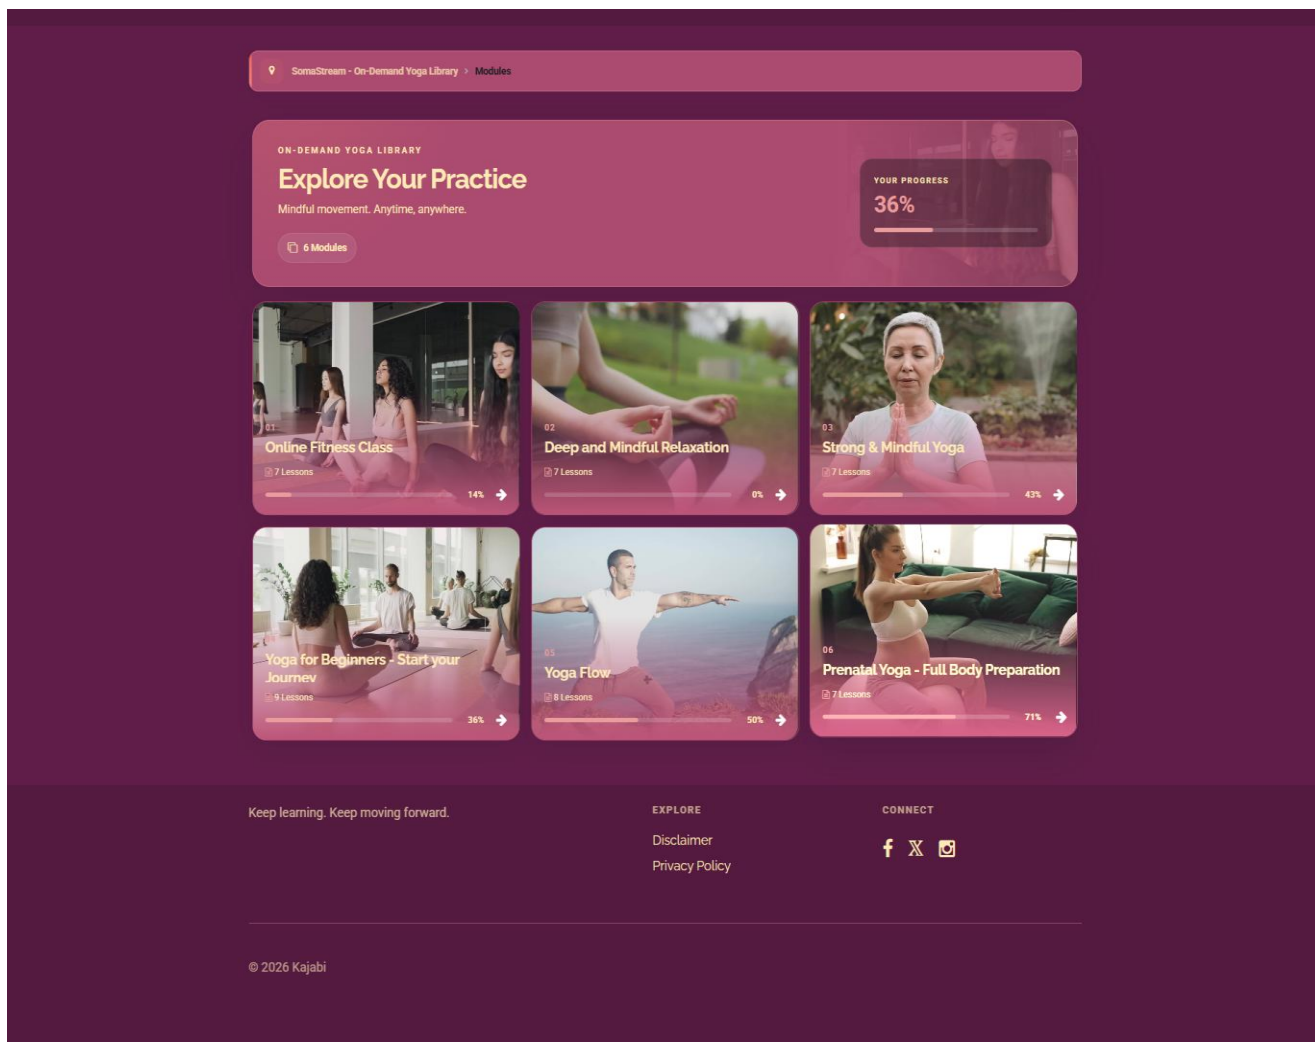

The popup opens with existing course posts already visible. As the member types, the list filters live; they are never greeted by an unnecessarily empty search panel.

Categories page

A course-level map of every module, with progress and access states.

Categories Page Layout: Cinematic Journey or Classic NOVA Grid, plus editable labels and fallback copy.

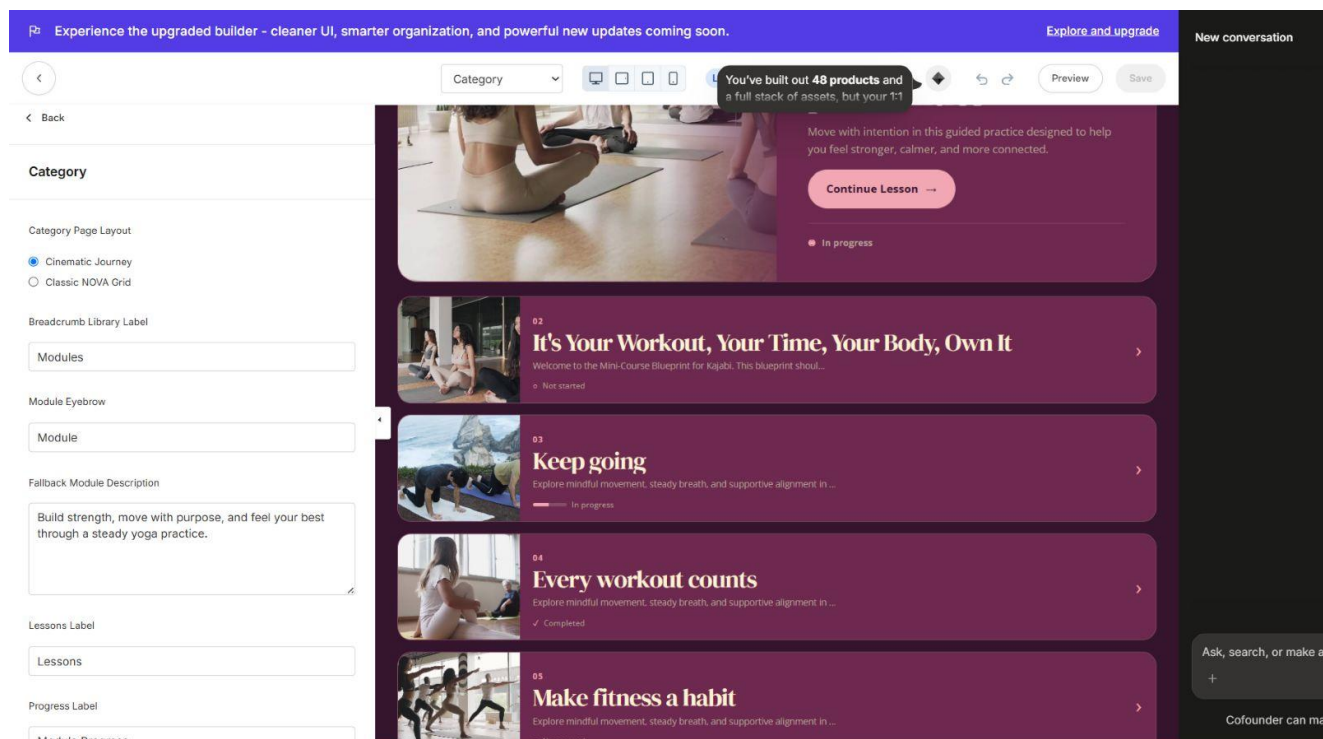

Cinematic Journey structure: course summary, overall progress and visual module cards.

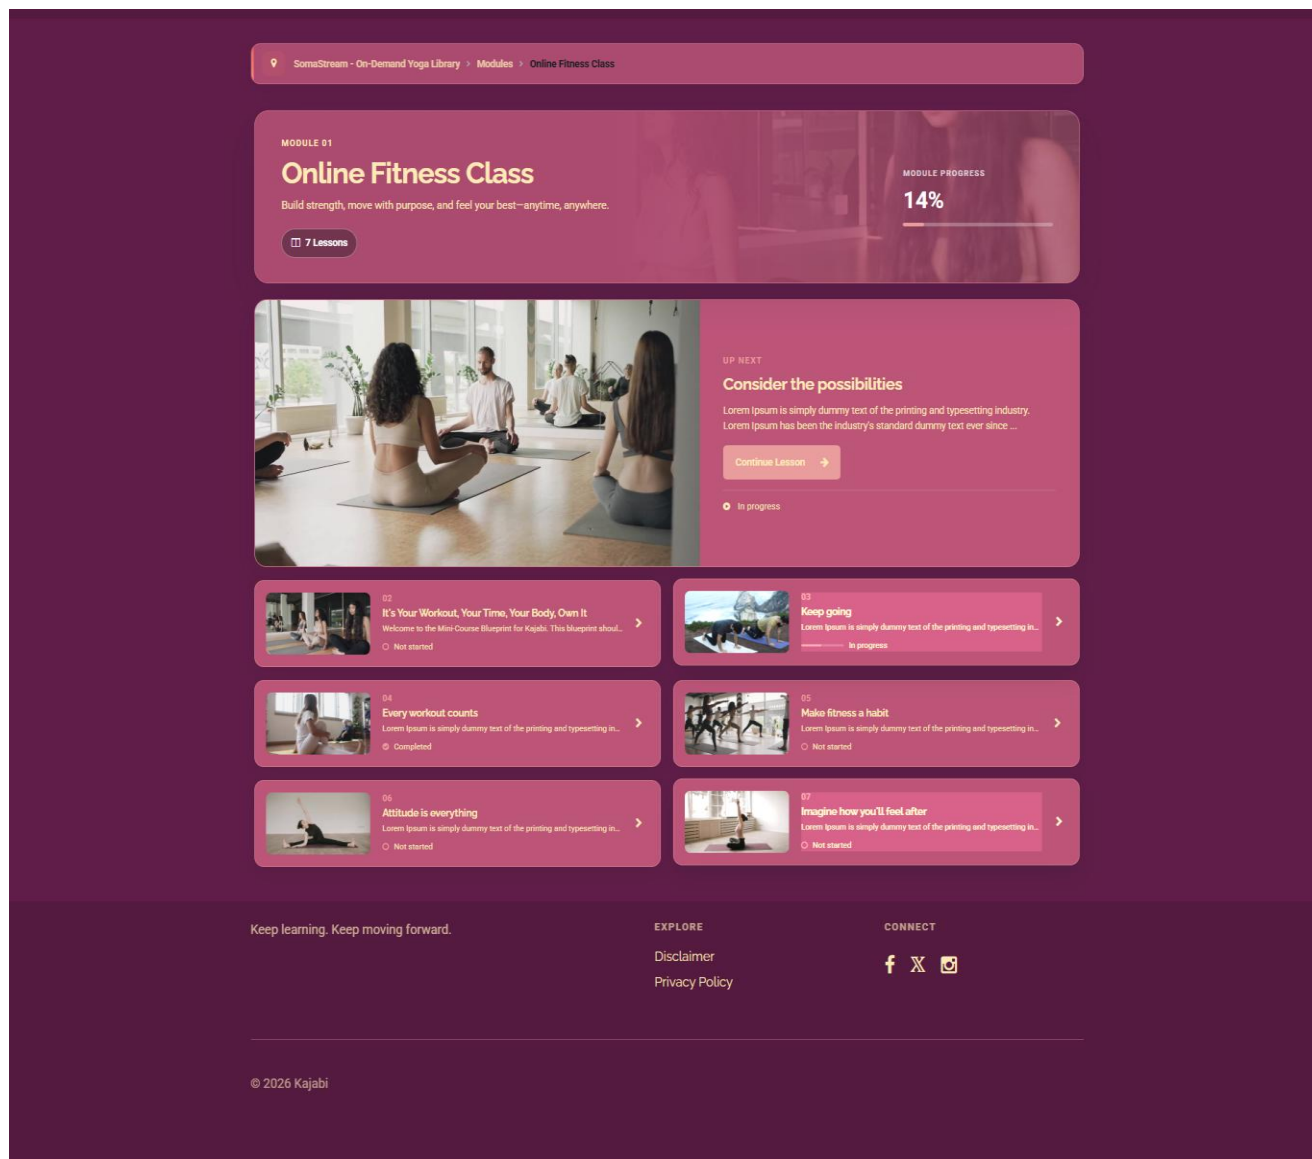

- Default: Cinematic Journey. Classic NOVA Grid remains available as an independent option.
- Module numbers, lesson totals and progress are pulled from Kajabi.
- Locked/paywalled modules show a lock icon; scheduled/dripped modules show a calendar-clock icon.
- Unavailable modules stay visually clear and non-clickable.
- Editable eyebrow, heading, introduction, progress, lesson and locked labels.

Category page

A focused module journey with a featured next lesson and compact supporting grid.

Category Page Layout: Cinematic Journey or Classic NOVA Grid with full label and fallback controls.

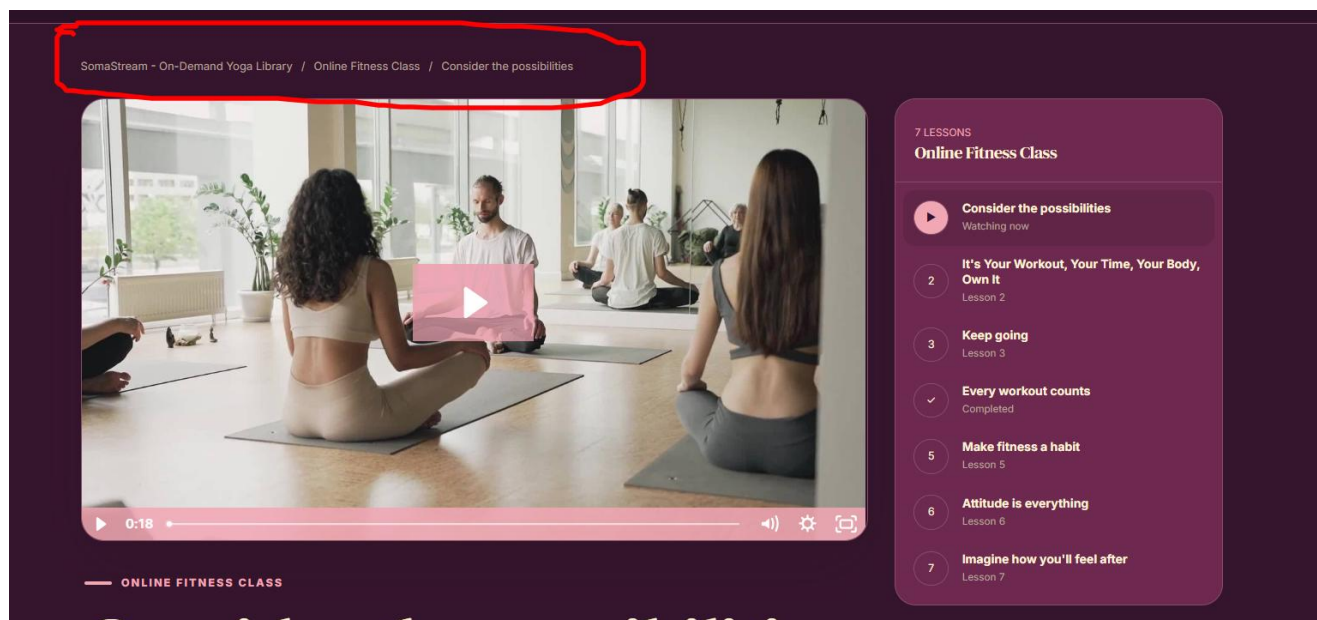

Category structure: breadcrumb, module hero/progress, Up Next lesson and compact lesson cards.

- Course → Modules → current module breadcrumb.
- Module summary with lesson total and progress bar.
- Featured Up Next lesson with image, description, status and Continue Lesson action.
- Compact two-column lesson journey for remaining posts, plus pagination when required.
- Subcategories are supported and use their own editable heading.
- Dummy placeholder copy is replaced by editable yoga fallback text; real Kajabi copy always wins.

Lesson experience

A focused player with familiar course context and complete Kajabi learning actions.

Lesson page: styled breadcrumb, media player and current category outline.

Media

Video player, native audio/MP3 presentation and lesson body content.

Learning actions

Complete Lesson, Saved state, comments and Kajabi assessments.

Resources

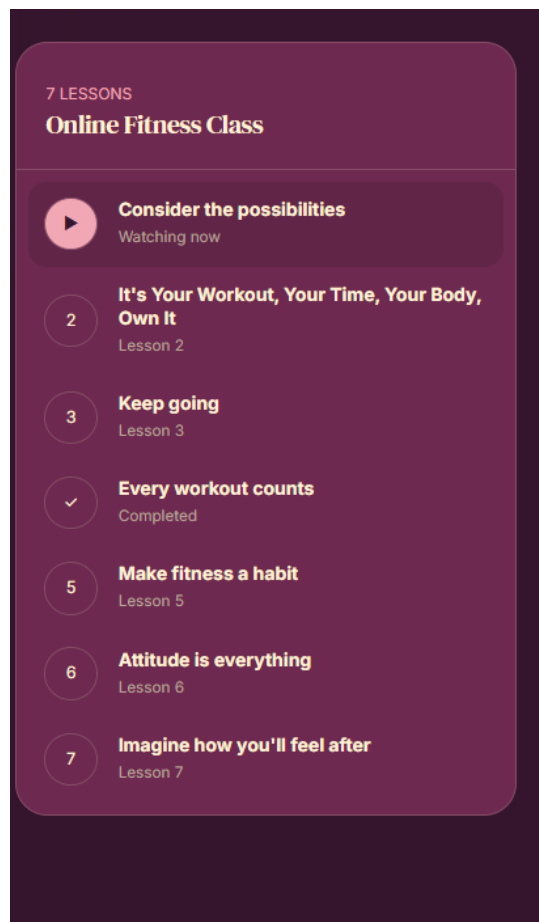

Download cards for Kajabi files, including downloadable MP3 resources.

Navigation

Previous/Next lesson actions plus a Categories switcher at the outline footer.

Previous and Next controls sit beside completion, saved status and the current lesson count.

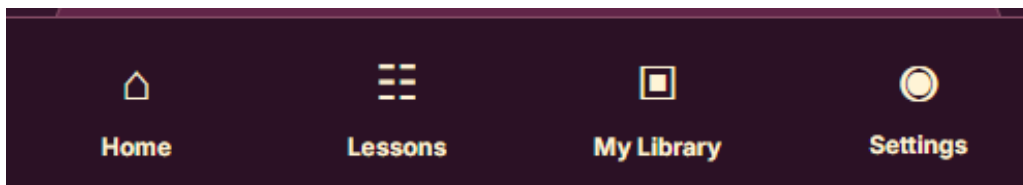

Desktop lesson outline includes a Categories action so members can switch modules at any time.

ACCESS-SAFE STATES

Locked, paywalled, scheduled and dripped lessons use clear iconography and messages. Unavailable destinations do not behave like normal clickable lesson cards.

Mobile member experience

Persistent navigation and context-aware slide-up panels on small screens.

Mobile bottom navigation appears across course pages: Home, Lessons, My Library and Settings.

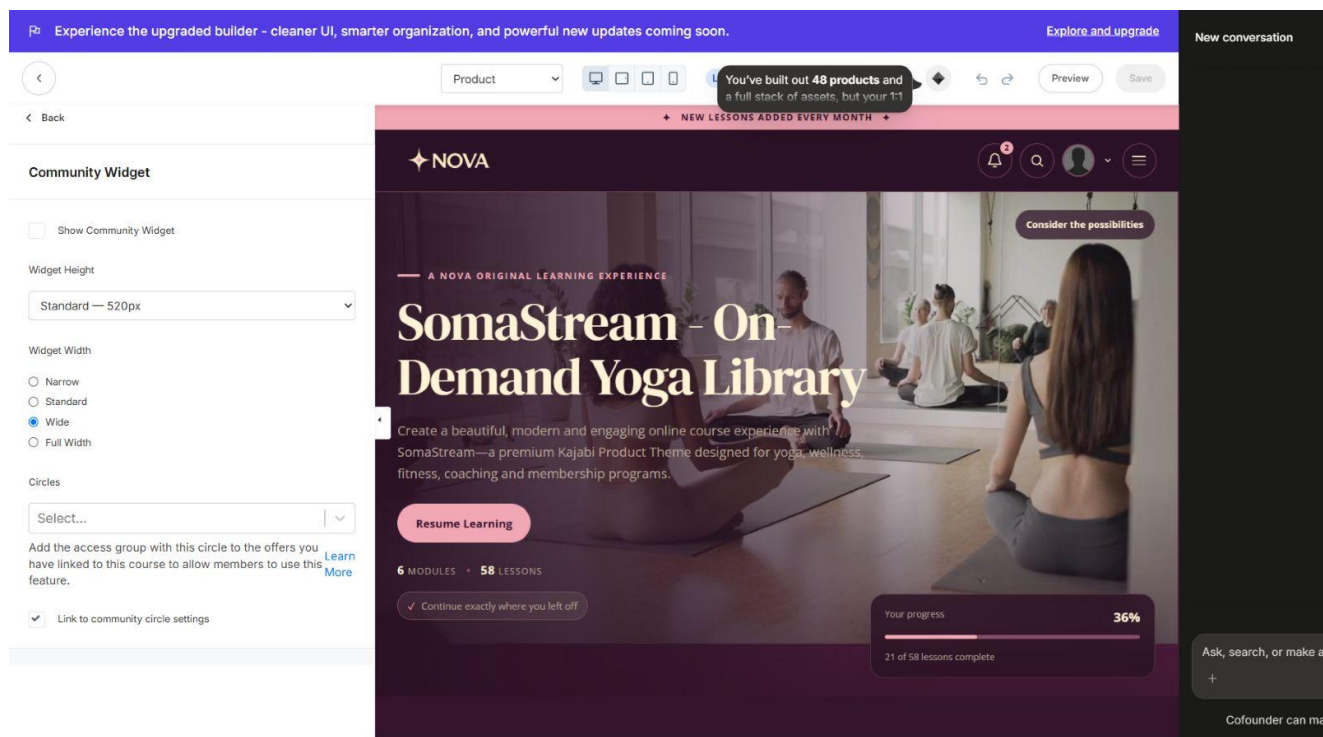

- Home returns to the current product home.
- Lessons opens the current category's posts while viewing a lesson.
- On other course pages, Lessons opens the category/module list.
- The lesson slide-up includes a bottom Categories button that opens the same category switcher.
- My Library and Settings remain one tap away.
- Favourites shelves and other horizontal collections support touch swiping.

RESPONSIVE DESIGN

Layout, card widths and typography adapt automatically; direct desktop font sizes are capped safely on mobile to prevent clipping and overflow.

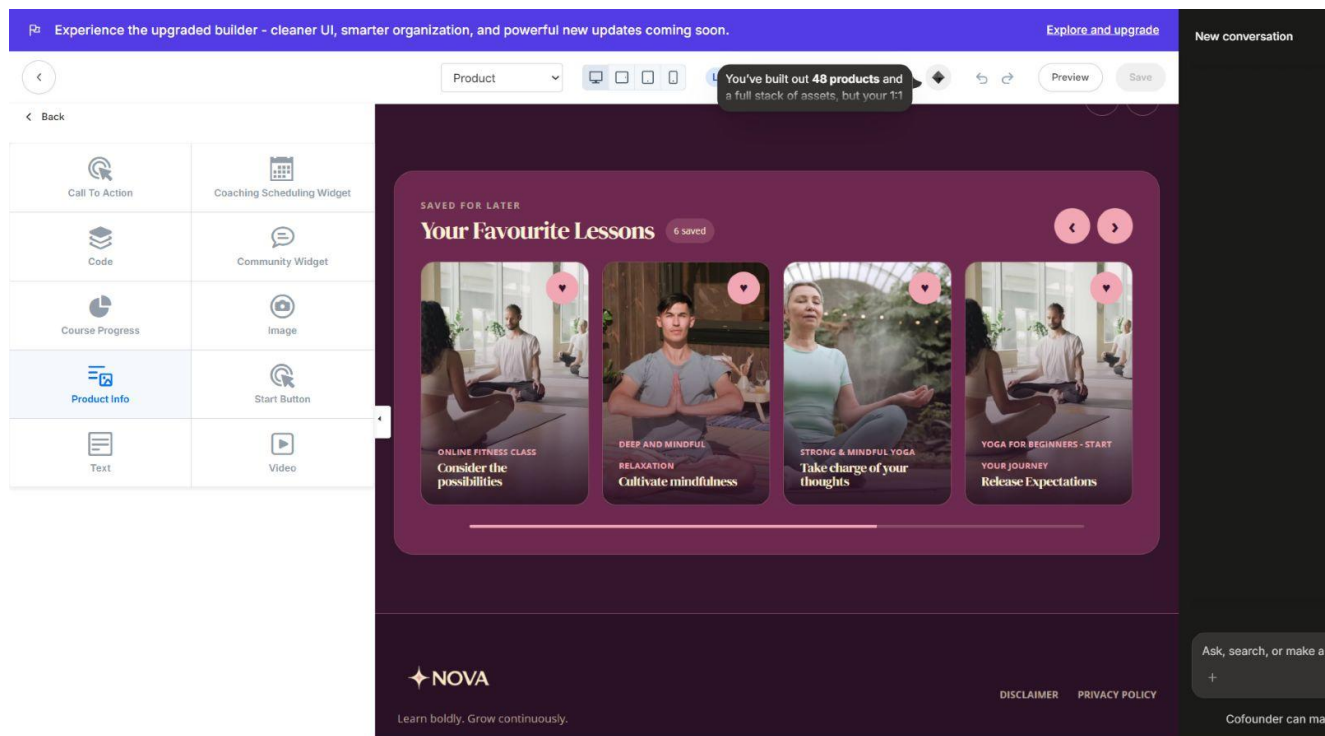

Community & Welcome Body blocks

Add supporting content without hard-coding a second homepage.

Standalone Community Widget: off by default, with compact-to-tall heights and narrow-to-full widths.

- Show/hide the Community Widget independently; default is Off.
- Choose 360, 440, 520, 640, 760 or 900 px height presets.
- Choose Narrow, Standard, Wide or Full Width container sizing.
- Select the Kajabi Circle and ensure the connected offer grants access.

Welcome Body block library, including Community Widget alongside native content blocks.

Content blocks

Text, Image, Video, Product Info, Course Progress and Start Button.

Action blocks

Call To Action and Coaching Scheduling Widget.

Advanced blocks

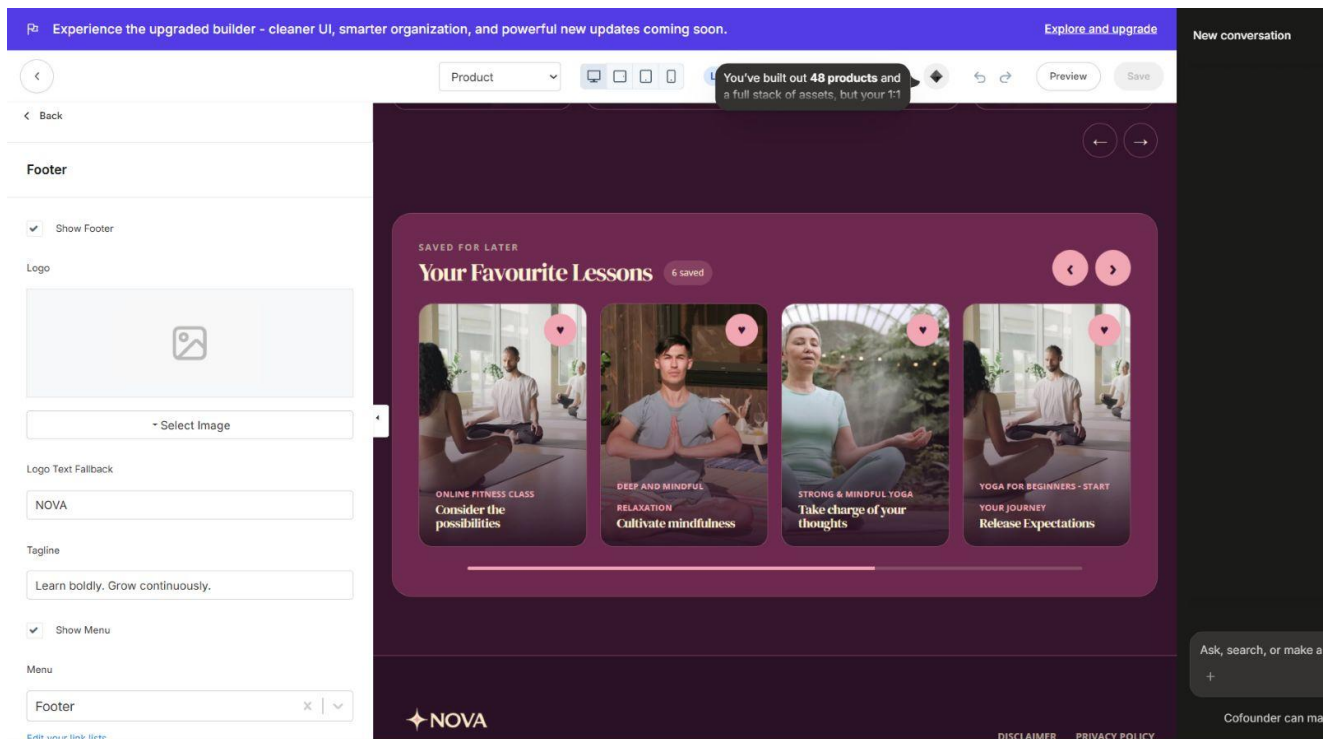

Code and Community Widget for custom or connected experiences.

Layout controls

Each supported block can use 1–12 columns to control desktop width.

Footer, copy & editor integration

Finish the experience with consistent navigation and easily editable language.

Footer controls: logo, tagline, menu, copyright and independent Powered by Kajabi visibility.

- Show/hide the complete footer, menu, copyright and Powered by Kajabi link independently.
- Use a logo image or text fallback and connect a Kajabi footer link list.
- Edit course labels, CTA copy, progress language, locked messages and fallback descriptions from the backend.
- Visible editor content uses context-aware kjb-settings-id attributes, so Kajabi opens the correct section or block when clicked.
- Real Kajabi content remains authoritative; fallback copy only fills incomplete or placeholder content.

PRODUCTION ARCHITECTURE

The active production assets are nova-theme-20260826.css and scripts.js. The uniquely named CSS asset helps avoid older Kajabi/CDN cache masking a theme update. Local storage is used only for the theme's favourite-lesson presentation when Kajabi state is not immediately available.

Production test checklist

Run this checklist after every major branding or layout change.

Area	What members get	Backend control
Install	Theme card is valid, active and opens Customize	Upload ZIP unchanged
Desktop home	Hero clears header; no blank bottom block; cards and dots align	Test all 5 hero + 3 home layouts
Categories	Course hero, module cards, progress and access states render	Test both page layouts
Category	Breadcrumb, Up Next and lesson grid work	Test both page layouts + pagination
Lesson	Video/audio/resources/comments/assessment load	Test complete, save, Previous/Next
Search	Suggestions are visible before typing and filter live	Test matching and empty states
Mobile	Bottom nav and slide-up panels appear on every course page	Test lesson vs non-lesson behavior
Access	Lock, paywall and drip cards show correct icon and do not open	Test with restricted member

Final release checks

- Test with a real member who has incomplete, completed, locked, paywalled and drip-scheduled content.
- Verify links, Kajabi actions, Explore More destination and category switching.
- Check contrast after changing the four global colors.
- Confirm logo, favicon, typography and H1/H2/H3 sizes on desktop and mobile.
- Confirm the Community Widget stays hidden when disabled and respects selected height/width when enabled.
- Confirm Powered by Kajabi matches the desired footer setting.

Quick reference

A compact handoff sheet for site owners and support teams.

Key defaults

Product Home Featured Categories	Categories Page Cinematic Journey
Category Page Cinematic Journey	Community Widget Off
Package nova-learning-kajabi-theme-1.0.1.zip	Edition Advanced Themes

Where to change common items

Area	What members get	Backend control
Colors	Theme Settings → Colors	4 global controls
Fonts & sizes	Theme Settings → Typography	Body/Heading + Body/H1/H2/H3 px
Hero	Product → Cinematic Hero	5 layouts
Home structure	Product → Product Syllabus	3 layouts + favourites
Explore More	Product → Product Syllabus	Editable text + Kajabi action
Search/announcements	Product → Header / Search	Visibility + editable labels
Categories	Categories → All Categories	2 layouts
Category	Category → Category	2 layouts
Community	Product → Community Widget	Off, height, width, circle
Footer credit	Footer → Show Powered by Kajabi	Independent toggle

HANDOFF NOTE

Keep the original ZIP as the distribution master. If a future release is upgraded, retain the same folder structure and version the existing package instead of creating random parallel ZIPs.
